

Hydrotherapy Treadmills & Pools

World Renowned

Canine Underwater Hydrotherapy Treadmills

The Only Choice for Peace of Mind

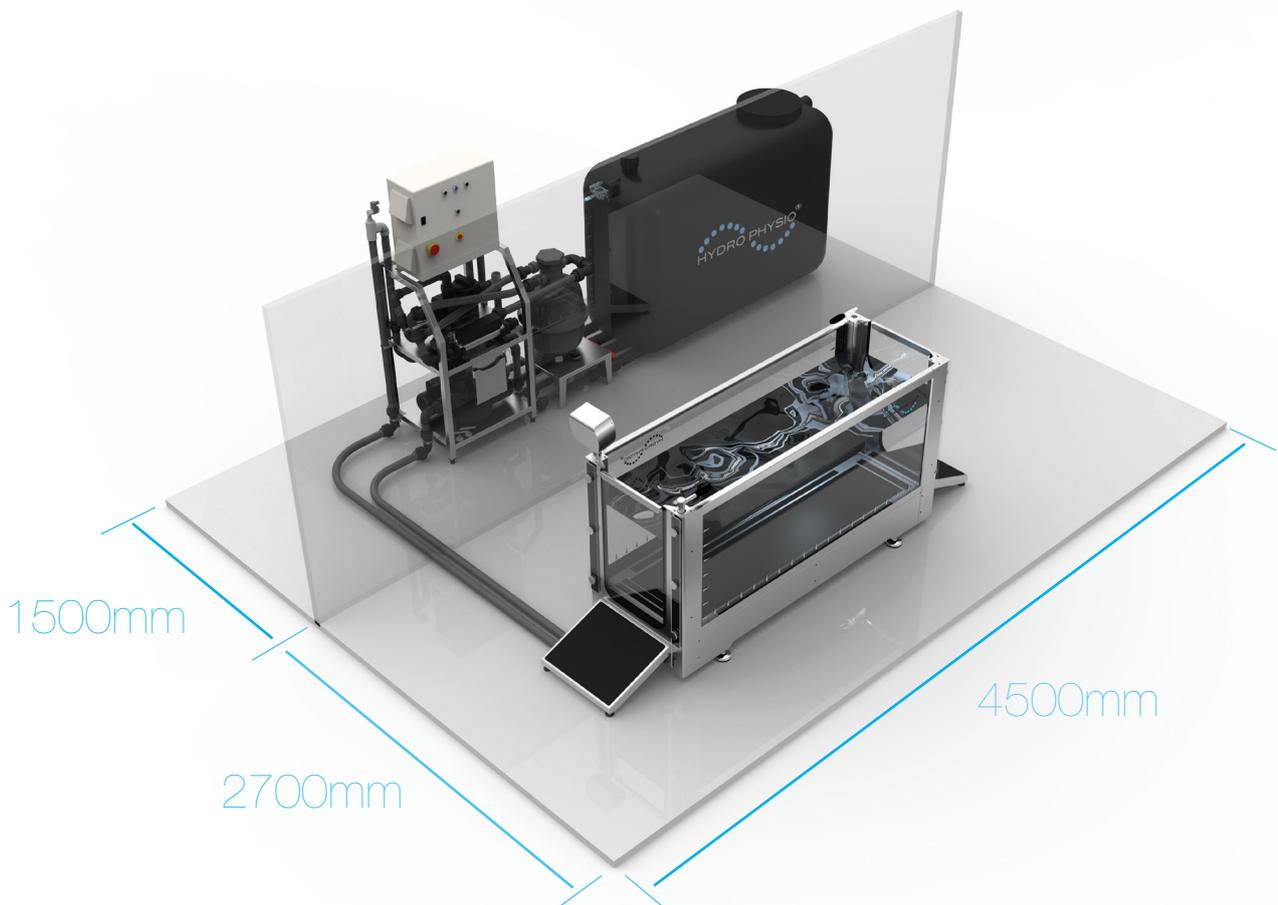

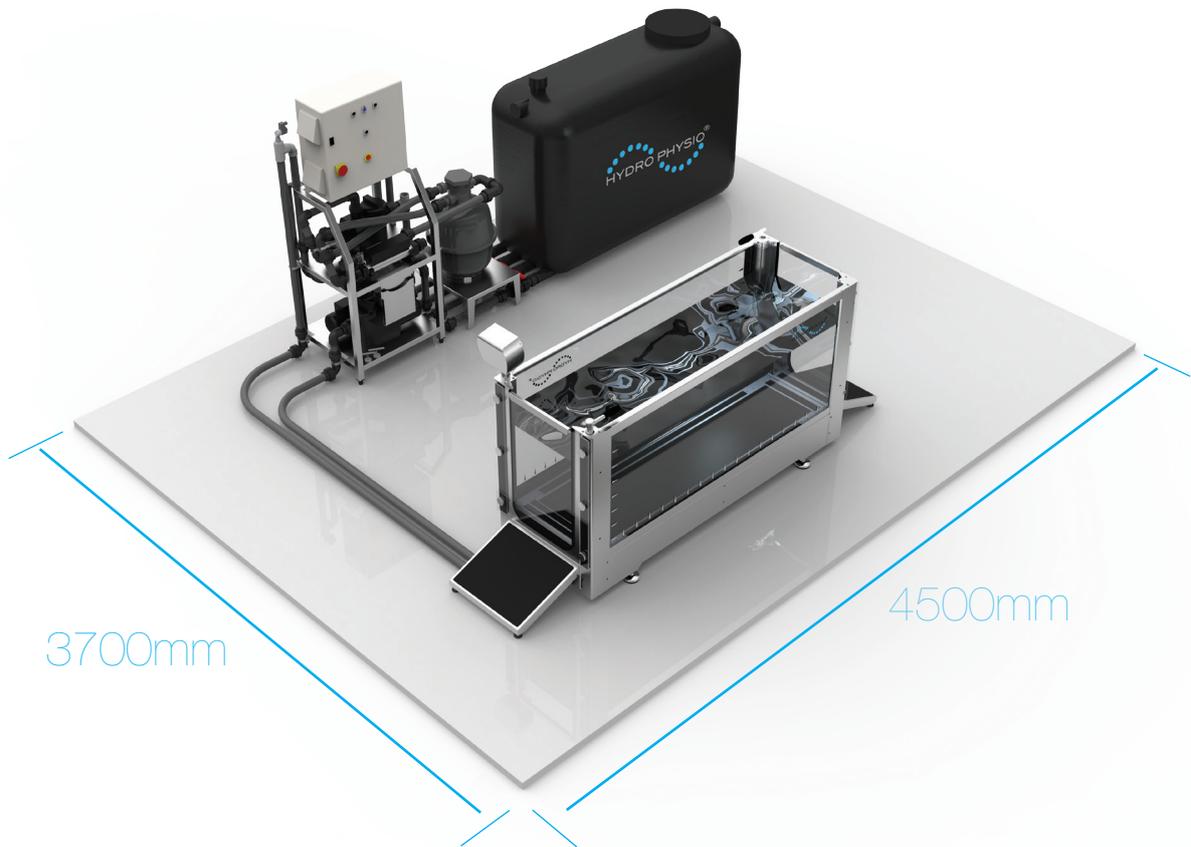

HYDRO PHYSIO treadmills are designed and manufactured in the UK. We are proud to have achieved BSI standard certification for our design and manufacturing capabilities and we aim to maintain the highest standards in everything we do.

We understand buying a treadmill is a major decision. Many customers have their own finance in place, however for some this can be a minefield. We offer a variety of solutions with a wide range of funding schemes and providers (UK customers only).

Typical Equipment Layouts

Free No Obligation Site Survey & Complete Room Design Service.

Bespoke Layout Configurations Available.

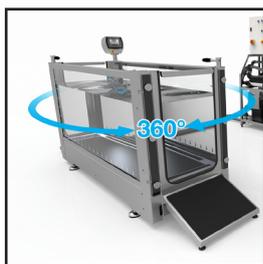

Features

Door Handle

Our second generation treadmills offer one handed operation, our doors are the easiest to use

360° Viewing Angle

Offers a light airy feel for patient comfort and easy viewing for the clinician

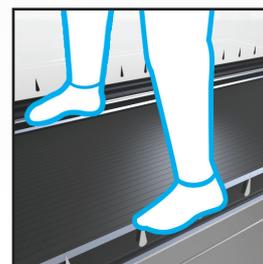

Frameless Doors

Our sleek new design has resulted in a streamlined look with easy to reverse feature (extra parts required)

Easy Maintenance

The treadmill bed now features integral guards and rear vertical lift making maintenance stress free

Side Platforms

Allow the clinician to accompany a patient in the treadmill in comfort and safety

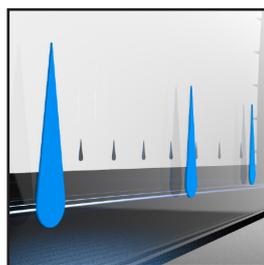

Pressured Micro Filtration

Using fine media, our filtration system works continuously on the stored water, ensuring clarity & hygiene

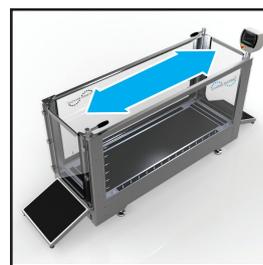

Push Button Interface

Simple, robust waterproof controls, colour screen and emergency stop make operation intuitive

Stride Indicators

Indicators add a visual marker reference to enable the clinician to gauge patient movement and recovery progress

Reversible Belt Direction

This feature helps with difficult patients and room orientation for ease of use

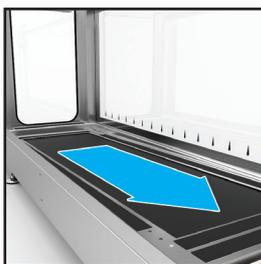

Walk Through Design

Important for spinal cases and large breeds. Can ease patient comfort and confidence

Options

Belt Incline

Allows the pitch of the moving surface to be altered thereby changing patient footfall

2 Length Choices

Standard length for where space is a premium. Extended length for large breeds

Pool Fed System

Utilises a swimming pool to supply the treadmill water. Saves space, storage tank costs and water heating

Ramp Lengths

Extended length access ramps allow for a shallower incline. Suitable for very infirm and geriatric patients

Door Reversal Kit

Allows doors to be hinged differently. Used where layout does not suit the standard configuration

Service Packs

For customer who prefer to cover all eventualities and costs, we can cover all aspects for peace of mind.

Touch Screen

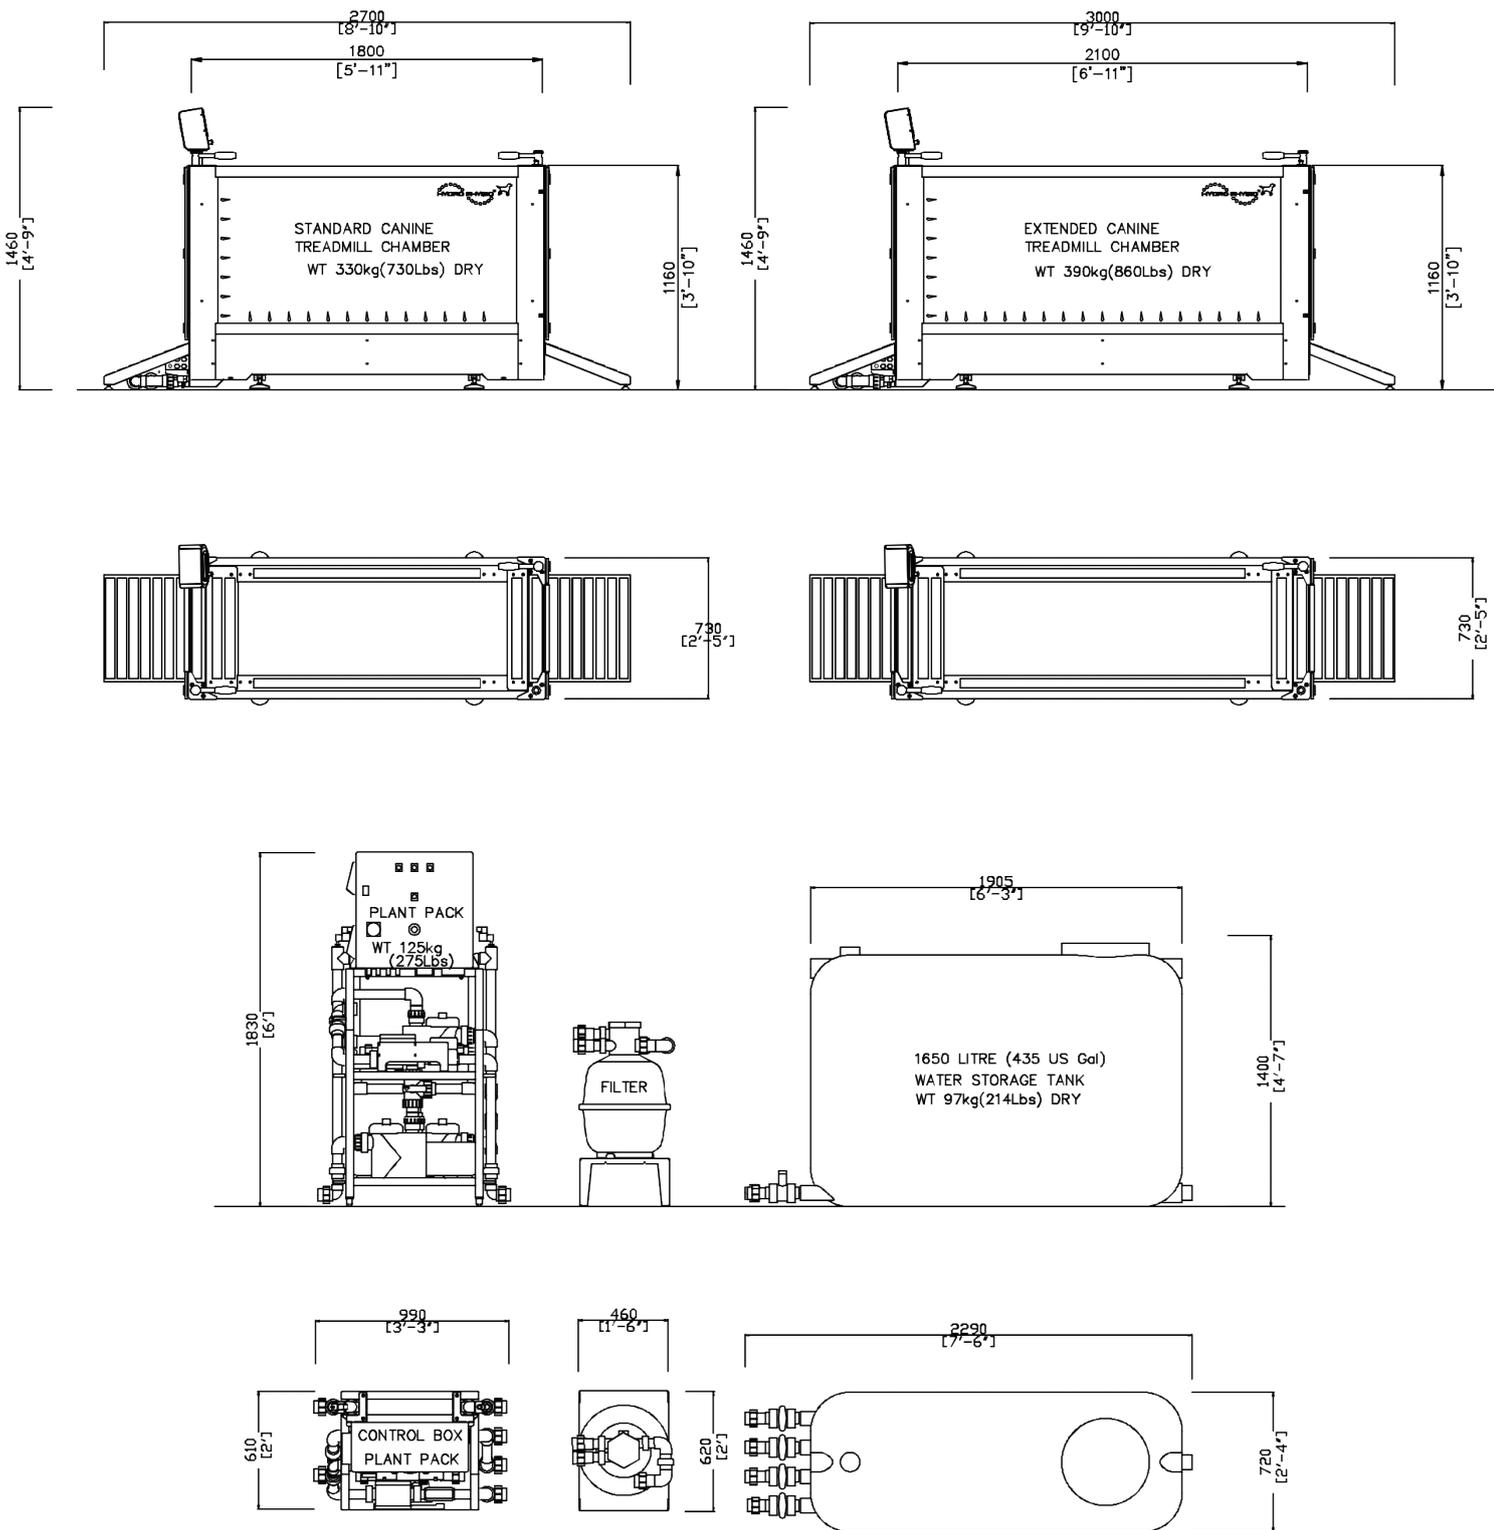

The HMI colour touchscreen offers greater control and flexibility. Programmes can be tailored to suit individual patient requirements

Insulation Jacket

Improve heat retention in the storage tank and lower running costs. It looks smart too!
